A proposal to the planning committee.

Introduction and a brief overview. Pun

Dear members of the planning committee, I would like to pitch a brand new service in our library. I hope you will find my idea helpful and consider implementing it to improve students' lives. ST

As you may know, modern ⁵⁰ pupils usually prefer to spend time on the internet because it's much simpler to get a desired experience through it. I believe that installing a digital system in our library would make students more attracted to reading and help them find a perfect book for either pleasure or education. They will be able to search for a desired book, read reviews on it or write their own through ¹⁰⁰ the system. SP

Practical information and benefits. SP
Making such a service would require some hardware such as a server to hold the database and a couple of terminals to access the system. ¹⁵⁰ You'll need to hire dedicated staff members to run the service and write reviews. SP

The system will serve as a way to make students more integrated into reading and will help to improve their social and scientific knowledge. SP

Conclusion.

ST Thanks for reading my proposal. I hope you will be able to make a fair judgement of my idea and implement it into our school library. 200

Your faithful,

K1: $2 + 1 + 1 + 2 + 2 + 1 = 9$

K2: $1 + 1 = 2$

K3: $3 + 2 + 1 = 6$

A proposal to the planning committee.

• Introduction and a brief overview.

Dear members of the planning committee, I would like to pitch a brand new service in our library. I hope you will find my idea helpful and consider implementing it to improve students' lives.

As you may know, modern pupils usually prefer to spend time on the internet because it's much simpler to get a desired experience through it. I believe that installing a digital system in our library would make students more attracted to reading and help them find a perfect book for either pleasure or education. They will be able to search for a desired book, read reviews on it or write their own through the system.

• Practical information and benefits.

Making such a service would require some hardware such as a server to hold the database and a couple of terminals to access the system. You'll need to hire dedicated staff members to run the service and write reviews.

The system will serve as a way to make students more integrated into reading and will help to improve their social and scientific knowledge.

• Conclusion.

Thanks for reading my proposal. I hope you will be able to make a fair judgement of my idea and implement it into our school library.

Your faithful,
