Writing

ANSWER SHEET

11-04-1

The enhancement of the school library

Not so long ago the news about our library being expanded flew throughout the whole school. The aim of this writing is to propose a few new ideas connected with the library and suggest a few ways of improving the service.

• Stationary computers

Our school had always been considered as one of the top educational institutions in town, but never had any computers in the library. My suggestion is to provide them to our students, so they can always have access to Internet at school.

• Expensive, though worth it

The project requires a solid funding, as buying computers as well as (even for school) is not as cheap as it may seem. Everything is needed are basically a working space and the machines. Although, every computer will also require a mouse and a keyboard to be functional, it is not too problematic to purchase them.

• Beneficial for everyone

Arranging a computer section ^{would} not only be helpful for teachers, but would also open up a vast range of useful tools for students. For instance, both teachers and children can use them to prepare for their lessons. As an another example, students may have access to presentations in cloud storages or make documents via special programmes not leaving school building, which is really needed some-times.

• 21st century is era of technology

I find the concept of granting access to PCs in our school to be revolutionary. Our school needs changes, and the best change that could happen is making students' lives easier.
