ANSWER SHEET

9-13-1

The Library Helper

1. Introduction: ~~and~~

Nowadays, libraries are not as popular <sup>10</sup> with children and teenagers as they used to be. But <sup>20</sup> nonetheless, they provide a way for students to find a <sup>30</sup> book they need for lessons or for entertainment. Because of that, I think schools should make it easier for them <sup>50</sup> to do so.

2. Description:

My idea is to create a database containing <sup>information about</sup> all of the books in the library, called "Library Helper". It ~~will~~ have all the needed facts about a book: author, genre, length and a shelf <sup>it's</sup> located on. User can search for books not only by their name but their author and genre too. If someone else has already taken the book, the application will show the date you can get it.

3. Needed equipment and arrangements:

To realize my project, a computer or a tablet is needed. Also when new books arrive, librarians should input information about them in the database.

4. Benefits:

I believe that my project, "Library Helper" will be quite beneficial for our school. Firstly, it ~~will~~ help students find a book they would like, because librarians simply can't remember every book the library has. Secondly, if the book is lost, it can show who hold it last. And finally, the larger the library, the more book there are and I ~~am~~ sure that "Library Helper" can make organising them easier.

5. Conclusion:

Reading has always been one of my favourite activities and I hope that my project will make <sup>our</sup> library more interesting for students.

$8 + 2 + 3 + 1 + 1 = 15$  *Wp*
