ANSWER SHEET

9-23-1

Introduction New Library System

I am writing this proposal to suggest an idea for some new service in our school library. I think that expanding the library is a great opportunity to make something new there.

~~My~~ The idea

I believe that our library needs a new system of finding books. New computer technologies can make this process easier. It would be perfect if students could just write the title of the book they need and the system showed them the area ~~where~~ where they could find the book.

Style

What is needed for the realization?

lex

Firstly, we need computers. I ~~think~~ think that three computers will be enough for the first time. Secondly, somebody has to draw a map of our library. The hardest part of the project is programming the system, so it can find books. But our IT-teacher or a hired professional can do it. Lastly, there should be some people that would write the location of every book and its title.

Why do we need it?

Our school library is very big and it is really hard for students to find books quickly. Every year getting a book there gets harder and harder due to the amount of books there. This system will save our time and energy.

Conclusion

That is all I wanted to say. Our library has a big potential of becoming the greatest in our city. I hope you will like my idea. If you have any questions, please, do not hesitate to call me.
